

Chanonry Sailing Club Membership Report for 2015 AGM

Club membership has seen a healthy rise this year, comparing figures from January before the 2015 renewals and 19 October when it might be expected that there will be no more new membership applications this year.

These figures take into account the actual number of members included in all membership categories including family memberships.

As usual there has been some turnover with some members not renewing and new members joining. Also a few formerly "Full" members who no longer sail at Chanonry SC have changed to Associate Membership to maintain a connection to the Club rather than leaving altogether.

Overall membership numbers have risen by about 15% from 192 to 222 members. Notable in this has been an increase in junior and adult members who join to benefit from dinghy training both in formal courses and ongoing training and coaching opportunities. Also of note this year has been the introduction of the "Associate plus Rowing" membership category for those taking part in coastal rowing who do not sail with 9 members. The availability of moorings also continues to attract a small number of new members.
